

SBS

100 - 200 - 400

Smart brewery system

The **smart brewery system SBS** present characteristics of absolute excellence in quality of construction, in technology for self-management of mashing and wort boiling. The system is quick, simple, easy handling, easy to clean, and allows a low level of oxidation of the wort.

The system **SBS** are designed in three different capacities: **100**, **200** and **400** It maintaining a high quality of beer production.

The system, equipped with an agitator with a couple of blades, is electrically heated and controlled by a self-learning device for efficiently managing each recipe.

With **SBS**, the brewer can create and customize many different recipes and be guided through the brewing process with a visual and audible media that informs in real time.

The system includes the filtration system, with increased filtering basket, the sparging kit, the cooling system, equipped with a steel pump and a plate heat exchanger, and the support frame with hoist.

	FINISHED BEER	BOILER CAPACITY	DIMENSION OF FRAME + BOILER	POWER SUPPLY
SBS 100 €	100 L	150 L	1200x1350x1800H	POWER 5,5+2 KW 380V 3F 50HZ
SBS 200 €	200 L	270 L	1400x1700x2500H	POWER 10+4 KW 380V 3F 50HZ
SBS 400 €	h400 L	520 L	1500x1800x3400H	POWER 20+8 KW 380V 3F 50HZ
